

Welcome to VMI. Where materials and design from the rigors of the offshore yachting industry always apply.

Crossover technologies between the overland and marine industries have allowed us to produce some amazing results for advanced world class expedition trailers and vehicles.

WELCOME TO LONGEVITY.

OX

Overlanding in a Small Package that will do Anything, Anywhere, Anyway you want.

Fabricated out of aerospace aluminum with a vehicle weight of only 740 pounds, ready-to-roll wheels/tires, spare tire, toolbox, full welded roof rack and 75 cubic feet of storage, the X-tender series OX trailer is one of the lightest, strongest and most spacious overland trailers available. The OX comes ready to roll for any adventure, but like all Xtender trailers can be tailored to fit your specific needs. It will follow you anywhere and provide you with a full complement of high-end features so you can get off the grid and focus on your world on your terms.
